

Take part in improving Breast Cancer Research

Do you take an oral hormonal (endocrine) treatment for HR+/HER2- metastatic breast cancer or advanced breast cancer? Researchers need your help! Let us know how your treatment is working for you by participating in a series of virtual surveys about your experiences.

Why should I participate in this study?

Your insights and experiences will help researchers better understand how an oral treatment for breast cancer is working for patients in their day-to-day lives.

Why does this matter?

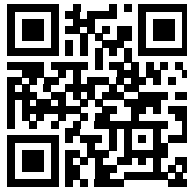

Breast cancer is the most frequently diagnosed cancer among women and one of the top causes of cancer-related deaths among women. By taking part in this study, you will be furthering scientific research so that medical professionals may help to better treat people with breast cancer in the future.

What will I have to do?
